SHOWCASING THE DATA

TONIE TROTTER, ANALYST
MARCH 2007

This Is Me, Tonie Trotter, Trying to Get Ready for My CHIA/OSHPD 6 City Seminar.

What Is Patient Level Data?

❖ Emergency Department (ED)

❖ Ambulatory Surgery (AS)

❖ Inpatient Hospital Discharge Data (IP)

Public Data Set

Inpatient

- Admit/Discharge Date is converted to length of stay

- Procedure Date is converted to the number of days from the admit date

Emergency Department & Ambulatory Surgery

- Service Date is converted to service quarter

All Data Types

- DOB is converted to age categories (0-5, 6-10, etc.)

- SSN is confidential and encrypted

Our Vision

Welcome to the Office of Statewide Health Planning and Development (OSHPD). As part of the California Health and Human Services Agency, our vision is to promote **Equitable Healthcare Accessibility for**

Featured Items

The Preventable Hospitalizations in California: Statewide & County Trends (1997-2003) is the second OSHPD report that employs the Prevention Quality Indicators, created by the US Agency for Healthcare Research and Quality, to understand California healthcare issues. This report provides statewide and county rates for preventable hospital admissions in 2003 and shows how these have changed over time. The report also shows how these events relate to the insurance coverage of patients.
►Press Release...

NEW **Emergency Department and Ambulatory Surgery Patient Data - January to December 2005** is now available. The data include patient demographic information such as age, sex, county of residence, race/ethnicity, diagnostic information, treatment information, disposition, and expected source of

OSHPD FDD Ombudsman - If you have questions or any unresolved issues or complaints about OSHPD's Facilities Development Division (FDD), you may call the Director's Hotline at: 1-916-653-0288 and speak to the Ombudsman.
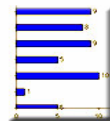

The California Report on Coronary Artery Bypass Graft Surgery: 2003 Hospital Data - The 'California Report on Coronary Artery Bypass Graft Surgery (CABG) 2003 Hospital Data' is the first mandatory state report on the quality of heart bypass surgery in California. The report uses risk-adjusted operative mortality as its measure of quality. Heart bypass surgery ranks among the top 10 hospital procedures in terms of number of cases, mortality post procedure, costs, and hospital revenue

Hospital Seismic Safety Bulletin: This bulletin shares the latest news on OSHPD's partnership with the state's approximately 450 acute care hospitals to meet retrofit deadlines. Also included are recent items that may be of interest to those involved in hospital construction.
►Seismic Retrofit Program...

NEW Hospital Fair Pricing (Charity Care) Policies: AB 774 (Chapter 755, Statutes of 2006) requires each licensed general acute care hospital, psychiatric acute hospital, and special hospital to increase public awareness of the availability of charity care, payment discounts, and government-sponsored health insurance; and to standardize its billing and collections

How To Find - Forms & Instructions

The Office offers a variety of services including insuring loans for public and non-profit healthcare facilities; collecting data from California's licensed facilities; assisting in the designation of Health Professional Shortage Areas; and providing loan repayment funds for medical students. This Forms and Instructions page will assist you in finding the needed forms to participate in these and other programs.

Find Data - Inpatient Hospital Discharge Data

Every six months, California licensed hospitals are required to submit specific data on every patient discharged from their facility. Reported data includes patient demographic information, such as age, sex, county of residence, and race/ethnicity; diagnostic information; treatment information; disposition; total charges; and expected source of payment. Hospitals report their patient data via the Medical Information Reporting for California System (MIRCal).

Public Set
The Public Set on CD was developed using a masking technique that masks values for certain demographic data elements from unique patient records. The masking of selected demographic data element occurs in a predetermined order. Data are available beginning with the 1999 reporting period. Due to its size, the *Public Set* is available for purchase on CD-Rom only. To purchase a public dataset(s), co[...] the Patient Level Data Request and Data Use Agreement Form a[...] the form to the Healthcare Information Resource Center (HIRC) at [...] 324-9242 or phone (916) 322-2814 for more information.

Documentation (pdf) accompanies the dataset and is also provided here for viewing prior to purchase:

2005 | 2004 | 2003 | 2002 | 2001 | 2000 | 1999

Case Mix Index
The Case Mix Index (CMI) is a measure of the relative cost or resources needed to treat the mix of patients in each licensed California hospital during the calendar year. An example of how the CMI is used and the method to calculate it is here.

Data Use Agreement

The Office of Statewide Health Planning and Development (OSHPD) collects and disseminates patient discharge data pursuant to the mandates found in the Health Data and Advisory Council Consolidation Act, Health and Safety Code section 128675 et seq. It is the policy of the Office to protect patients' rights of confidentiality as required by that Act. We have, therefore, developed a de-identified patient-level data set.

In accessing patient level data, I agree to the following:

- I will not further distribute any patient-level data or individual patient records, and I will not permit others to do so.
- I will not use or permit others to use the data to learn the identity of any individual patient.
- I will not link or permit others to link the data with any other individual level data that would increase the potential for patient identification.
- I will indemnify, defend, and hold harmless OSHPD from any or all claims and losses accruing to any person, organization, or other legal entity as a result of violation of this agreement.
- I understand that any violation of this Agreement may be subject to appropriate legal action by the State of California.

Other Information

Emergency Department (⬅️**Surgery (AS) Profile Reports**
ED and AS Profile Reports (pd_____gh MIRCAL and may be accessed
by data type, facility ID# or facili_____t period begin and end dates. Each
report consists of a two-page summary which represents the number and
percentage of each data element for a given facility.

New Report Descriptions

A) Ambulatory Surgery – Top Ten Procedure Groups – 2005

- A statewide listing of the top ten principal procedure groups, based on
  Current Procedural Terminology, Fourth Edition (CPT-4). Includes both hospital
  based ambulatory surgery and freestanding ambulatory surgery centers.

B) Emergency Department (ED) Encounters – 2005

- A listing, by hospital, of the number of ED encounters. Includes both ED
  encounters and admissions through the ED.

C) Emergency Department (ED) – Top Ten Cause of Injury - 2005

- A statewide listing of the top ten principal external cause of injury codes
  reported by Emergency Departments. This data is only from ED encounters
  that did not result in a hospital admission.

D) Emergency Department (ED) – Top Ten Diagnoses and Diagnoses Groups - 2005

- A statewide listing of the top ten principal diagnosis codes reported by
  Emergency Departments. Also included is a statewide listing of the principal
  diagnoses groups (based on ICD-9-CM codebook chapters). This data is only
  from ED encounters that did not result in a hospital admission.

Other Information

Emergency Department (ED) and Ambulatory Surgery (AS) Profile Reports
ED and AS Profile Reports (pdf) are collected through MIRCAL and may be accessed
by data type, facility ID# or facility name and report period begin and end dates. Each
report consists of a two-page summary which represents the number and
percentage of each data element for a given facility.

New Report Descriptions

A) Ambulatory Surgery – Top Ten Procedure Groups – 2005

- A statewide listing of the top ten principal procedure groups, based on
  Current Procedural Terminology, Fourth Edition (CPT-4). Includes both hospital
  based ambulatory surgery and freestanding ambulatory surgery centers.
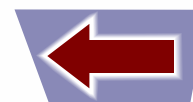

B) Emergency Department (ED) Encounters – 2005

- A listing, by hospital, of the number of ED encounters. Includes both ED
  encounters and admissions through the ED.

C) Emergency Department (ED) – Top Ten Cause of Injury - 2005

- A statewide listing of the top ten principal external cause of injury codes
  reported by Emergency Departments. This data is only from ED encounters
  that did not result in a hospital admission.

D) Emergency Department (ED) – Top Ten Diagnoses and Diagnoses Groups - 2005

- A statewide listing of the top ten principal diagnosis codes reported by
  Emergency Departments. Also included is a statewide listing of the principal
  diagnoses groups (based on ICD-9-CM codebook chapters). This data is only
  from ED encounters that did not result in a hospital admission.

OSHPD ID	Facility Name (337 facilities)	County Name	EMS Level	# of ED Encounters that did not result in an admission at same hospital	# of ED Encounters that resulted in an admission at same hospital	Total Reported # of ED Encounters for 2005
010735	ALAMEDA HOSPITAL	Alameda	Emergency - Basic	14,473	2,298	16,771
040802	BIGGS GRIDLEY MEMORIAL HOSPITAL	Butte	Emergency - Standby	5,892	419	6,311
100822	UNIVERSITY MEDICAL CENTER	Fresno	Emergency - Comprehensive	39,226	8,699	47,925
580996	RIDEOUT MEMORIAL HOSPITAL	Yuba	Emergency - Basic	40,198	4,585	44,783
	Totals (337 facilities)			8,556,699	1,627,818	10,184,517

Licensed EMS Levels are:

Standby - emergency medical care in a hospital where an EMS physician is at minimum, on-call. (See Title 22, Div. 5, Secs. 70651-70657, Calif. Code of Regulations)

Basic - emergency medical care in a hospital where an EMS physician is on staff 24 hours a day, year-around. (See Title 22, Div. 5, Secs. 70413-70419)

Comprehensive - emergency medical care in a hospital where an EMS physician is on staff 24 hours a day, year-around. Other physician specialties required for this level, 24 hours a day year-around, includes but is not limited to thoracic surgeon, neurosurgeon, orthopedic surgeon, and pediatrician. The hospital must also provide Burn, Acute Dialysis, and cardiovascular surgery services. (See Title 22, Div. 5, Secs. 70453-70459)
